CS151/YJ.py - 0
CS151/test.py - 2
CS151/DarkSoulsPlayer.py - 2
CS151/AmbersBot.py - 2

Plan for Today

- Before you head out for today I'd like an email with the following:
  - What the overall idea for your project is
  - How you have broken the project up and who is working on each piece
  - Some specifics about what each piece will involve
    - What other pieces will it interact with?
    - What does it need from or provide to those pieces?
    - What specific functions or methods are you envisioning will be necessary?
  - I can't stress enough, the more planning you do now, the more headache you will save yourself later
- I'm more than happy to give you feedback before you send it
- Can write directly in the email or include a document as a pdf (please no other filetypes)
- Will be your class and lab participation points for the day
